

Physical Properties

Ductility @ 77° F, 5cm/min 15.0	Penetration 150g per 5 sec 85%	Specific Gravity @ 77° F (25°C) 1.13
Elongation 150%	Softening Point 320°F (Ring and ball)	Thickness 40 mils
Flash Point 580°F		

Description

MT212 - MARITAPE 40 HATCH COVER TAPE is recommended for marine applications where the weather and sea conditions can be moderate and predictable, and only demand a medium strength tape. **MT212 - MARITAPE 40 HATCH COVER TAPE** makes it possible to acquire reliable, flexible and effective medium duty sealing for the hatch cover. **MT212 - MARITAPE 40 HATCH COVER TAPE** offers far greater strength than duct tape but does not quite equal the heavy duty, critical service strength offered by **Ram-Nek® Marine Tape**.

Usage

Typical uses include barge hatch covers, ship's hatch covers (if heavy weather is expected, use **Ram-Nek Marine Tape**), tank covers, weather deck doors, and metal pipe protection from cathodic and corrosion conditions.
