Notes

1. The modifiedPLUS® flashing membranes are thermofused to the primed substrate (non-combustible). The granule surfaced cap sheet can be left exposed.
2. Alternatively, use modifiedPLUS® NP180 Tack Sheet as a self-adhered base sheet flashing and thermofuse the granulated cap sheet flashing over.
3. Apply Poly-Tac™ or 910-01 when using thermofusible membranes. For self-adhered modifiedPLUS® NP180 Tack Sheet use Tack Sheet Adhesive 930-38.
