

**Notes**

1. Ensure positive drainage towards scupper.
2. This detail does not include a cant strip. If a cant strip is used, flash as per typical details.
3. Drainage in the immediate area around the scupper may be facilitated by incorporating a sump into the insulation components.
4. The modifiedPLUS® membranes may be thermofused, self-adhered, applied in hot asphalt, or applied in cold adhesive. Consult Technical Data Sheets for specific information as well as priming requirements.

modifiedPLUS® Roofing Systems

**SCUPPER**

CONVENTIONAL ROOFING ASSEMBLY

Scale: N.T.S.

Plot: 1:5

Issued: 05-14-97

Revision: 05
